

ISO readiness and certification services

An internationally recognized approach to information security

Overview of ISO

The International Organization for Standardization (ISO) was founded when delegates from 25 countries met at the Institute of Civil Engineers in London in 1947, and decided to create a new international organization “to facilitate the international coordination and unification of industrial standards.”

Since then, ISO has published more than 22,000 International Standards addressing almost all aspects of technology and manufacturing.

ISO International Standards ensure that products and services are safe, reliable, consistent, and comprise good quality materials and construction. For businesses, these frameworks are strategic tools that reduce costs by minimizing waste and errors while increasing productivity. They help companies access new markets, level the playing field for developing countries, and facilitate free and fair global trade via common practice benchmarks and expectations.

An ISO certification can help your organization secure financial information, intellectual property, employee information, and information entrusted to third parties. When appropriate, ISO certifications can reduce compliance costs by leveraging processes, procedures, and controls for other compliance efforts and can be a powerful competitive differentiator that demonstrates your ability to keep information assets secure.

Coalfire Certification

Coalfire Certification, the certification arm of Coalfire, is a registered certification body (CB) with both the ANSI National Accreditation Board (ANAB) and the United Kingdom Accreditation Service (UKAS). Coalfire Certification is accredited to issue management system certifications against the ISO/IEC 27001:2013, ISO 9001:2015, ISO/IEC 27701:2019, ISO 22301:2019, and ISO/IEC 20000-1:2018 standards. All certificates can be validated by third parties using our certificate directory available at www.coalfirecertification.com.

Coalfire Certification has qualified and competent assessors to validate your management system against the following standards:

- **ISO 9001:2015** – Quality Management System (QMS)
- **ISO/IEC 20000-1:2018** – Service Management System (SMS)
- **ISO 22301:2019** – Business Continuity Management System (BCMS)
- **ISO/IEC 27001:2013** – Information Security Management System (ISMS)
- **ISO/IEC 27017:2015** – Security in the cloud based on an established ISMS
- **ISO/IEC 27018:2019** – Protection of Personally Identifiable Information (PII) in the cloud based on an established ISMS
- **ISO/IEC 27701:2019*** – Privacy Information Management System (PIMS) based on an established ISMS
- **Cloud Security Alliance (CSA) Security Trust Assurance and Risk (STAR) Certification**

*PIMS certification is an extension of accredited ISO/IEC 27001:2013 certification.

Certification services

Coalfire Certification’s specialists provide expert-driven assessments that allow you to better understand the ISO certification process and stay focused on your business. Our certification service offering includes:

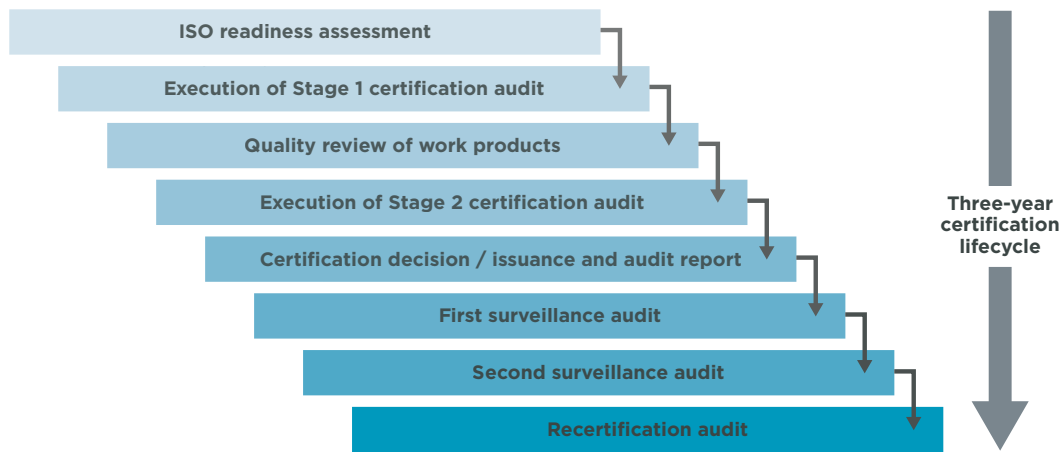

ISO readiness assessment

Perform readiness assessments against the mandatory certification requirements, comprising Clauses 4 through 10 of either the ISO/IEC 27001:2013 or ISO/IEC 27701:2019 standards.

Certification

Provide a comprehensive assessment to ensure your organization’s compliance with relevant ISO standards and international frameworks, such as the CSA Cloud Controls Matrix (CCM).

ISO certification lifecycle

Make your compliance programs efficient and empowering with these services.

Coordinated assessments:

Simplify assessments and align efforts across frameworks to reduce audit fatigue and total cost of compliance.

Compliance management:

Maintain and improve security with year-round, proactive management of your compliance program.

Market development services:

Get return on compliance investment and grow market share with services that help you expand into new markets, create competitive differentiators, and accelerate pipeline.

Prepare for ISO certification.
